

EXT RANGE

PRODUCT PROFILE (SEE OVER FOR TECHNICAL DETAILS)

DESCRIPTION:

Suitable for single or multi room applications designed for installation on outside walls. EXT high performance centrifugal wall mounted fans are available in 3 sizes. They are suitable for most ducted systems in residential and commercial applications

INSTALLATION:

The EXT fan range is designed for installation on external walls and are ideal for moving medium to large air volumes against higher static resistance, where aesthetics, space or noise are a concern

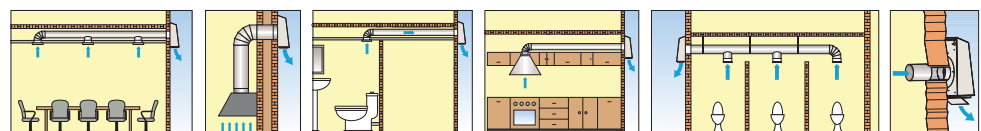

BENEFITS:

- Ideal for multi point extraction
- Outdoor installation to maximize interior space
- Comply with European Low Voltage Directives
- High performances and pressure from 185m³/h to 760m³/h and 241 Pa to 528 Pa
- Heavy gauge, spun steel housing with baked epoxy finish
- Easy maintenance
- Backward curved blades to ensure lowest sound levels and develop ample static pressure
- Can be used with rigid or flexible ducting
- Variable speed controllable
- Ball bearing motor, permanently lubricated for maintenance free operation and continuous running

WARRANTY:

- 2 years

APPLICATIONS:
